

INTRODUCE NEW WORKING POLICIES AND

Make Your Employees Thrive in Desk Sharing Offices

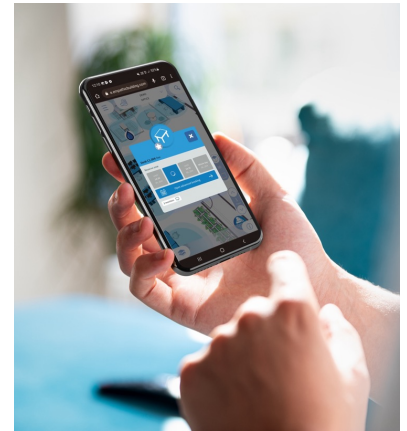

Implement desk sharing at scale within days and without stress - speed up the adaptation of people to changes, while keeping them happy

Maximize **space efficiency** for Hybrid Work

Desk sharing is the best way to organize your hybrid workplace while simultaneously cutting costs. Here is why:

- Utilization rates are as low as 30% in an average office.
Space can be reduced or repurposed to better fit people needs
- People come to office for **face-to-face interaction and collaboration**. They need more flexibility of where to work
- Greater efficiency of existing resources results in **lower business costs and supports sustainability initiatives**.

Manage and introduce **changes empathically**

Empathic Building is the most intuitive and easy to use software made for people and suitable for mass deployment. The major enablers are:

- **Zero-click, Two-click and Future Booking™**
Book desks, rooms or phone booths in seconds to save time or plan in advance
- **Desk & Room capabilities**
Add room pictures, show number of screens, save to favorites for easy access, search for anything and anyone
- **Integrate with existing systems via API**
Users can book directly from your enterprise calendar or from Empathic Building application
