Room 4: Utilization 67%

Total Utilization Rate – Rooms   Month ▼

December 2023

Discover the actual space potential of your hospital with utilization data.

Technology built for hospitals.

- Deployment in days with wireless solution – no interruptions to care services
- Mobile connectivity, outside of the hospital's IT
- Works perfectly underground and with concrete walls due to self-healing MESH network.
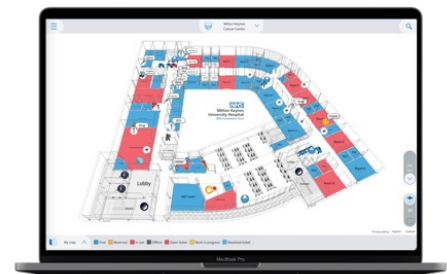

Designed for people and easy adoption.

- No employee tracking
- No cameras
- Privacy safe and anonymous
- GDPR compliant
- ISO27001 standard compliant.

Solution that grows with your needs.

- More than 20 data types and a big sensor portfolio to choose from Haltian
- HW agnostic – integrate with anything
- No lock-in with one vendor.

Wireless data collection sensors

"Based on the [data] insights, we decided that we don't need to construct a new auditorium. This has saved us 10-20 million NOKs."

Cato Heimvik,
IT Director,
Stavanger University Hospital,
Norway
